

INTELLECTUAL PROPERTY

A Primer for Academia

Prof. Rupinder Tewari

Ms. Mamta Bhardwaj

The present book offers a clear and focussed view on all categories of Intellectual Property (IP); not only in terms of its concepts, methods and procedures, but also in the context of institutions offering IP courses, IP related web-portals, national/international organizations dealing with IP and patent status of higher education institutes of India. Though, India has a rich repertoire of IP classified entities in the domains of literature, arts, science, traditional medicines, food products, textiles, designs, etc. but registration of these items/inventions as IP is its Achille's heel. True potential of IP can be harnessed by stimulating awareness of IP in schools, colleges, universities and research institutions across India. To fill this gap, a few universities have started new courses and established research centres for enhancing IP knowledge.

However, imparting robust IP knowledge requires an updated quality text material, which is of paramount importance. This book provides an excellent resource material for a complete course on the fundamentals of IP. This book will be helpful to students, researchers, scholars and teachers engaged in this subject along with the general readers having an interest in the domain of Intellectual Property.
