FOREWORD

India stands at a defining moment in its economic journey, driven by bold reforms, strategic vision and an unwavering commitment to global competitiveness. Under the dynamic leadership of our Hon'ble Prime Minister Shri Narendra Modi ji, the Atmanirbhar Bharat initiative has laid a strong foundation for industrial transformation, innovation and India's expanding role in global trade and manufacturing.

In this broader national endeavor, the release of the Guidebook on Mapping of Harmonized System of Nomenclature (HSN) Codes marks a landmark achievement. By establishing product-level linkages across multiple Ministries and Departments, this initiative creates a robust framework for unlocking manufacturing potential and integrating Indian industries more effectively into global value chains. It equips enterprises with the clarity, support and tools required to meet international standards, expand exports and enhance competitiveness on the world stage.

Spearheaded by the Department for Promotion of Industry and Internal Trade (DPIIT) and developed through extensive consultations across the Government of India, this exercise draws upon deep domain knowledge and diverse sectoral expertise. Such cross-ministerial alignment will enable policymakers to respond to industry demands with greater agility, identify emerging opportunities with sharper precision and design interventions that are both timely and impactful.

The insights from this exercise will strengthen India's position in trade negotiations, attract investments and drive innovation across key sectors. They will also help domestic enterprises scale the global value chain and reinforce India's role as a trusted partner in international trade. Supporting the vision of Viksit Bharat@2047, this guidebook will serve as an important tool in building a resilient, future-ready and globally competitive economy.

I extend my sincere appreciation to DPIIT and all participating Ministries and Departments for their valuable contributions to this significant initiative. Such efforts will go a long way in strengthening India's trade architecture, fostering sustainable growth and deepening our engagement with the global economy.

Government of India

India's economic landscape is undergoing a transformative shift, where growth is increasingly driven by sector-specific insights and targeted interventions. As the nation advances toward its long-term development goals, the need for granular strategies—especially at the level of individual products—has become more pronounced. This evolution underscores the importance of precision in policy formulation across key domains such as trade negotiations, skilling, and quality standards.

The Guidebook on Mapping of Harmonized System of Nomenclature (HSN) Codes is a strategic step in this direction. By systematically aligning products with the appropriate Ministries and Departments, it lays a robust foundation for structured engagement between industry and Government. This alignment fosters a deeper understanding of the product landscape, enabling sectoral initiatives to be more focused and impactful.

One of the core applications of this Guidebook is the identification and prioritization of high-potential product categories that warrant dedicated support. Ministries and Departments can leverage this mapping to initiate targeted programs—ranging from investment promotion and quality benchmarking to specialized skilling initiatives.

As India continues to expand its manufacturing capabilities and strengthen its position in global trade, the insights from this initiative will be instrumental in translating strategic intent into measurable outcomes. This Guidebook is envisioned as a valuable reference for policymakers, industry stakeholders, and development partners, contributing meaningfully to the vision of Viksit Bharat@2047—anchored in a vibrant and resilient industrial ecosystem.

Message

As India continues to expand across global trade, investment, and innovation, there is a growing need to address the diversity and complexity of the product base of the country. A rapidly evolving industrial landscape requires close policy alignment with sectoral priorities to respond to emerging opportunities.

In this context, the Guidebook on Mapping of Harmonized System of Nomenclature (HSN) Codes offers a comprehensive view of products under the purview of various Ministries and Departments which are best positioned to support the development of these products.

This initiative led by DPIIT involved the detailed mapping of HS codes to the relevant Ministries and Departments for providing a pathway to engage more effectively with industry to identify sector-specific opportunities and challenges and designing interventions that are relevant as well as impactful.

Beyond domestic sectoral development, the Guidebook has important implications for the international trade negotiations aimed at meeting the specific needs of each sector. Another important dimension of this initiative is its potential to strengthen data-driven sectoral initiatives as Ministries and Departments can monitor trends, assess performance, and address challenges. Building stronger linkages across the value chain, from raw materials to finished goods, and from domestic production to global exports shall be enabled.

Going forward, this Guidebook may serve as the basis for more focused sectoral strategies and accelerated industrial progress for the long-term economic growth and development of India.

ACKNOWLEDGEMENTS

The Guidebook on Mapping of Harmonized System of Nomenclature (HSN) Codes has been prepared by the Department for Promotion of Industry and Internal Trade (DPIIT), Ministry of Commerce & Industry, as part of its ongoing efforts to strengthen India's domestic manufacturing ecosystem, enhance ease of doing business, and support sectoral development. This initiative is a step towards unlocking new opportunities for industrial growth and trade facilitation.

This Guidebook is the outcome of a comprehensive and collaborative consultative process, involving active participation from various Ministries and Departments across the Government of India. We extend our sincere gratitude to all those who contributed by sharing valuable insights, offering sector-specific expertise, and engaging in constructive dialogue. Their collaboration has been instrumental in identifying key areas of alignment and shaping the findings presented in this report.

We hope this Guidebook serves as a valuable reference for policymakers, industry stakeholders, trade bodies, researchers, and think tanks working towards building a more export-oriented, resilient, and sector-responsive industrial landscape in India.

EXECUTIVE SUMMARY

The Guidebook on Mapping of Harmonized System of Nomenclature (HSN) Codes to Relevant Ministries/Departments, prepared by the Department for Promotion of Industry and Internal Trade (DPIIT), marks a transformative step in India's manufacturing and trade policy framework. This initiative shall support the national vision of Viksit Bharat@2047, aiming to strengthen domestic manufacturing, enhance trade facilitation, and foster sector-specific growth.

The Guidebook maps over 12,000 HS codes to corresponding Ministries and Departments of the Government of India, based on a rigorous analysis of the Allocation of Business Rules (1961), the CBIC Tariff Manual, and extensive inter-ministerial consultations. This mapping provides clarity on product ownership, enabling Ministries/Departments to formulate targeted policies, support trade negotiations, and engage more effectively with industry stakeholders.

This mapping shall empower Ministries/Departments to adopt data-driven, outcome-oriented approaches to manufacturing development, investment promotion, and effective trade negotiations. It shall serve as a foundational tool for building a resilient, competitive, and future-ready manufacturing ecosystem.

The mapping of Harmonized System (HS) Codes to relevant Ministries and Departments shall enable targeted enhancement of India's manufacturing capabilities, streamlining trade facilitation, and driving focused sectoral development. Out of 12,174 HS Codes, 11,679 have been accepted by 31 Ministries/Departments. The remaining 495 codes are grouped under a residual category with suggested Ministry alignments.

The Guidebook also proposes a structured way to leverage on the mapping exercise under three pillars:

1. Manufacture in India

- **Product-Centric Policy Interventions:** Ministries/Departments can leverage HS code insights to formulate tailored, product-specific policies that address the unique characteristics, challenges, and growth potential of high-impact product categories.
- **Value Chain Integration:** The mapping enables Ministries/Departments to identify critical components of the value chain, including raw materials, machinery, and interdependencies thereby facilitating coordinated and comprehensive product development strategies.
- **Skill Development:** Supports the design and implementation of targeted skilling programs aligned with the technical and operational requirements of specific products, thereby enhancing workforce readiness and industrial productivity.

2. Strengthen Brand India

- **Create a Robust Quality Ecosystem:** Ministries/Departments can use the mapping to identify product categories requiring quality enhancement and enforce Quality Control Orders (QCOs)

to ensure compliance with national and international standards, thereby improving consumer trust and global competitiveness.

3. Make for the World

- **Development of Trade Prowess through:**
 - Import Monitoring: Enable Ministries to systematically track import patterns, identify supply chain vulnerabilities, and assess overdependence on specific countries or commodities. This insight supports timely interventions to safeguard national economic interests.
 - Import Substitution: Facilitate the development of domestic manufacturing capabilities by identifying high-volume imports with viable local production potential.
 - Export Promotion: Leverage global demand data and trade analytics to identify high-potential product categories. Ministries can prioritize products with strong economic indicators such as Revealed Comparative Advantage (RCA) and low global market share for targeted export development strategies.
- **Trade Agreement Negotiations:** Ministries are equipped with detailed, product-level insights that enable them to contribute meaningfully to trade agreement negotiations. These insights support the formulation of precise recommendations on tariff concessions, the definition of Rules of Origin (RoO), and the evaluation of non-tariff barriers such as technical regulations and standards. This granular, data-driven approach ensures that India's negotiating positions in bilateral and multilateral trade agreements—including Free Trade Agreements (FTAs) and Comprehensive Economic Partnership Agreements (CEPAs)—are strategically aligned with national economic priorities, sectoral strengths, and domestic sensitivities. The integration of domain expertise with robust analytical inputs enhances the coherence, effectiveness, and competitiveness of India's trade engagements on the global stage.

INTRODUCTION

The Government of India has been consistently undertaking reforms to advance the manufacturing sector, which remains a cornerstone of economic growth and job creation. Through strategic reforms aimed at promoting manufacturing, innovation, enhancing digitization, and simplifying regulatory processes, a more enabling environment for industrial development is being fostered. Additionally, by encouraging collaboration between academia and industry, efforts are underway to bridge the skills gap and build a workforce equipped to meet the evolving demands of modern manufacturing. These initiatives collectively aim to boost productivity, enhance global competitiveness, and strengthen long-term economic resilience.

Recognizing the growing global emphasis on product-centric policy, DPIIT has undertaken a significant initiative to support this shift. In light of this, a comprehensive exercise has been carried out to map over 12,000 Harmonized System (HS) Codes to the corresponding Ministries/Departments of the Government of India. This mapping is based on a detailed study of the Allocation of Business Rules, 1961 and the Central Board of Indirect Taxes and Customs Tariff Manual supplemented by extensive Inter-Ministerial consultations and a thorough analysis of the entire value chain. This initiative shall support Ministries/Departments in driving sectoral growth and aligning product-centric policies with the needs of a globalized economy. To fully understand the scope and significance of this exercise, it is essential to explore the foundational concepts outlined in the sections that follow.

➤ **Allocation of Business Rules, 1961**

The Allocation of Business (AOB) Rules, 1961 allocates the business of the Government amongst its various Ministries/Departments. A Ministry/Department is responsible for formulation of policies of the Government in relation to the subjects allocated to it under AOB Rules, 1961 as well as for the execution, monitoring and review of those policies.

➤ **Central Board of Indirect Taxes and Customs Tariff Manual**

The Central Board of Indirect Taxes and Customs (CBIC) Tariff Manual is published by the CBIC, Department of Revenue. This Manual provides detailed descriptions for the classification of goods for custom purposes. [Click Here](#) to access CBIC Tariff manual.

➤ **Harmonized System of Nomenclature Code**

The Harmonized System of Nomenclature (HSN) Codes, developed and maintained by the World Customs Organization (WCO), are a standardized numerical method of classifying various products. These are used by Custom authorities worldwide to identify goods in a consistent manner, facilitating international trade and ensuring accurate tariff and duty assessments. The WCO standardizes product classification up to the 6-digit level, which is uniformly adopted by all member countries. Beyond this, individual countries apply further classifications. In India, the classification system is extended to the 8-digit level. The structure of the HS Codes is given below.

- **Section:** HS codes are divided into 21 sections, each covering a broad category of goods. Example: Section I covers ***Live Animals and Animal Products***.
- **Chapter:** Within each section, there are chapters that further categorize the goods. It is mapped at 2-digit HS Code level. Example: Chapter 1 covers ***Live Animals***.
- **Heading:** Each chapter is divided into headings that specify more detailed categories. It is mapped at 4-digit HS Code level. Example: Heading ***0102*** covers ***Live Bovine Animals***.
- **Subheading:** Each heading is divided into subheadings that provide the most specific classification of products. It is mapped at 6-digit HS Code level. Example: Sub-Heading ***0102 21*** covers ***Pure-bred breeding animals***.
- **Tariff Lines:** Each subheading is divided into tariff lines that provide the description of products. In India, it is mapped at 8-digit HS Code level. Example: Tariff Line (in case of India) ***0102 21 10*** covers ***Bulls***.

The key objectives of this initiative are as follows -

Figure 1: Key Objectives of HSN Code Mapping Exercise

THE MAPPING EXERCISE – APPROACH & METHODOLOGY

To conduct the mapping of Harmonized System (HS) Codes to the appropriate Ministries/Departments, the Department for Promotion of Industry and Internal Trade (DPIIT) adopted a comprehensive and structured approach. The mapping exercise was multi-phased, involving rigorous analysis, extensive stakeholder engagement, and coordinated inter-ministerial collaboration. It began with the identification of over 12,000 HS Codes at the 8-digit level, sourced from the CBIC Tariff Manual.

A value-chain analysis was conducted to trace the lifecycle of each product which provided critical insights into industrial linkages and the broader economic ecosystem surrounding each product including its use case.

Following this, DPIIT carried out an in-depth examination of the Allocation of Business (AoB) Rules, 1961, which define the functional responsibilities of various Ministries/Departments. This analysis was instrumental in determining the most appropriate Ministry or Department to be associated with each HS Code, based on the product's nature, function, and end-use.

Once the preliminary mapping was completed, DPIIT initiated consultations with relevant Ministries/Departments and Departments to solicit feedback and validate the proposed classifications. Ministries/Departments were encouraged to review the mappings in light of their domain expertise and provide recommendations for refinement.

To facilitate this collaborative process, DPIIT convened multiple Inter-Ministerial Consultations, serving as platforms for constructive dialogue and knowledge exchange. These consultations enabled the incorporation of diverse perspectives and sector-specific insights into the mapping exercise.

The feedback received was systematically analyzed and integrated into the final mapping, ensuring that the process remained inclusive, iterative, and reflective of ground-level realities.

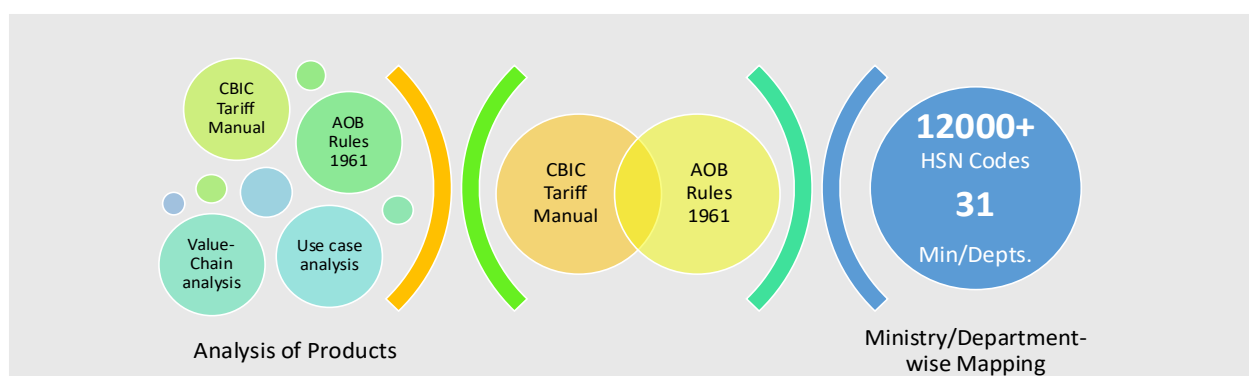

Figure 2: Approach & Methodology of the Exercise of Harmonization of HS Codes

As part of the exercise of harmonization of HS Codes, a comprehensive mapping of 12,174 HS Codes to relevant Ministries/Departments was undertaken.

HOW TO USE THE GUIDEBOOK?

As the Government of India advances toward the mission of Viksit Bharat, the primary objective is to accelerate economic growth by strengthening domestic capabilities, achieving economies of scale, enhancing cost competitiveness, and cultivating a skilled workforce. Further, it is imperative to integrate Indian firms into Global Value Chains, enhance the global perception of Indian products, and boost exports.

A whole-of-government approach is vital to drive this mission, enabling Ministries/Departments to operate cohesively. In this context, the HS Codes Mapping Exercise plays a pivotal role by facilitating targeted interventions aligned with national goals of economic growth and employment generation.

The present section outlines how the Guidebook may be used by Ministries/Departments to leverage on this exercise.

Figure 3: Key Elements for Guidebook Utilization

➤ **Manufacture in India**

To position India as a globally competitive manufacturing hub, the ‘Manufacture in India’ segment emphasizes on sector-specific policy alignment, value chain strengthening, and workforce development. Central to this effort is the HS Codes Mapping exercise, which can help identify high-potential product categories for enabling targeted policymaking, holistic sectoral development and focused skill development initiatives. This pillar provides insights into the facets required for developing a self-reliant manufacturing ecosystem.

- **Formulate Product-Centric Policy Interventions**

As India intensifies its efforts to strengthen the manufacturing sector, Ministries/Departments may build on the insights from the HS Codes Mapping Exercise to adopt a product-centric policy-making approach. This shall enable the formulation of sectoral policies customized for the specific characteristics, needs, and potential of each product category, thereby facilitating a shift from broad sectoral strategies to dedicated planning at the product level. Such policies shall also support better alignment with global trade trends and emerging opportunities, while benefiting MSMEs, which often require specific support to improve product design, adopt new technologies, enhance quality, and expand market access.

Ministries/Departments may begin by identifying products under their purview based on its strategic, economic, or trade relevance. In addition, engaging with manufacturers and industry

members shall help assess challenges and opportunities linked to these products. Based on these insights, targeted policies may be formulated to support research, quality enhancement, market development, and technology adoption. To ensure effective implementation, progress of policies may be monitored regularly through digital dashboards, enabling real-time tracking and timely policy recalibration. By adopting this structured approach, Ministries/Departments can significantly enhance the effectiveness of their manufacturing policies.

The Production Linked Incentive (PLI) Scheme for White Goods notified by DPIIT has significantly boosted domestic manufacturing, especially in the Air Conditioning and LED Lighting Sectors. The scheme has attracted major investments and fostered a strong ecosystem of component production. Given below is an illustration providing greater insights into the Scheme.

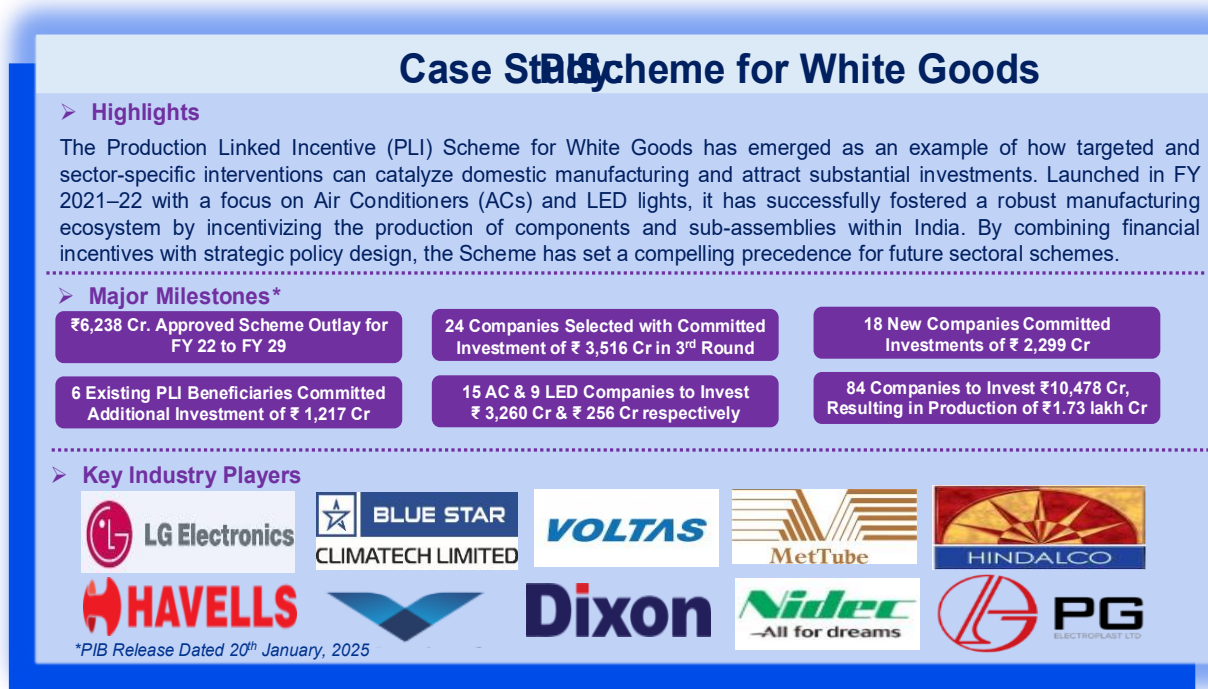

Figure 4: Case Study of the PLI Scheme for White Goods

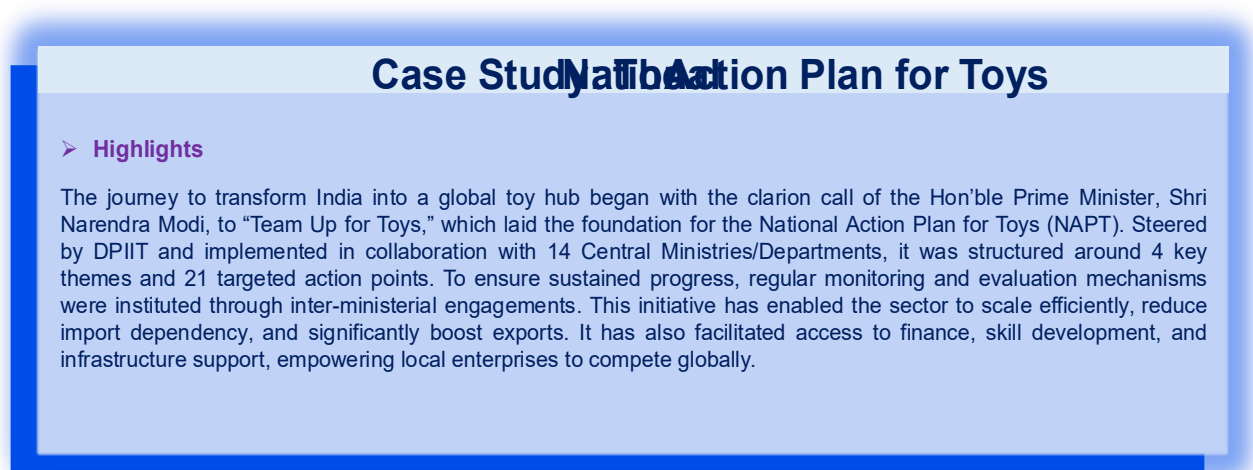

- **Enhance Manufacturing Capabilities through Value Chain Integration**

Establishing India as a global manufacturing hub requires a well-aligned approach to advancing manufacturing capabilities through integrated value chain development. The HS Codes Mapping exercise plays an instrumental role in this endeavor by outlining the products under the domain of various Ministries/Departments, thereby, enabling a comprehensive examination of the lifecycle of each product. By identifying critical raw materials, sourcing dependencies, required machinery, production processes and market access, opportunities may be explored that facilitate seamless value chain integration.

Furthermore, mapping interdependencies across Ministries/Departments highlights areas requiring collaborative support, such as Research & Development (R&D), logistics, skill development, and financing. This Inter-Ministerial synergy is essential for drafting policies that scale industrial capacity with market potential. As product ecosystems become more integrated, the manufacturing sector gains agility in responding to domestic demands and strengthens its position in Global Value Chains (GVCs). This integrated and data-driven approach lays the foundation for enhanced competitiveness, resilience, and innovation across sectors.

It is imperative for Ministries/Departments to prioritize value chain integration for focusing on strengthening linkages across all stages of production and ensuring robust coordination. Through regular reviews and progress tracking, this approach shall help India unlock new avenues for market and product diversification, ultimately positioning the country as a key player in the GVCs.

The National Action Plan for Toys (NAPT) has successfully integrated the value chain of the Toy Industry by aligning traditional artisans, MSMEs, modern manufacturers, designers, and exporters, thereby, fostering seamless coordination across production, design, quality control, and distribution. Given below is an illustration showcasing the success story of the NAPT and its impact on value chain integration.

Case Study National Action Plan for Toys

➤ **Highlights**

The journey to transform India into a global toy hub began with the clarion call of the Hon'ble Prime Minister, Shri Narendra Modi, to "Team Up for Toys," which laid the foundation for the National Action Plan for Toys (NAPT). Steered by DPIIT and implemented in collaboration with 14 Central Ministries/Departments, it was structured around 4 key themes and 21 targeted action points. To ensure sustained progress, regular monitoring and evaluation mechanisms were instituted through inter-ministerial engagements. This initiative has enabled the sector to scale efficiently, reduce import dependency, and significantly boost exports. It has also facilitated access to finance, skill development, and infrastructure support, empowering local enterprises to compete globally.

Figure 5: Case Study of the National Action Plan for Toys

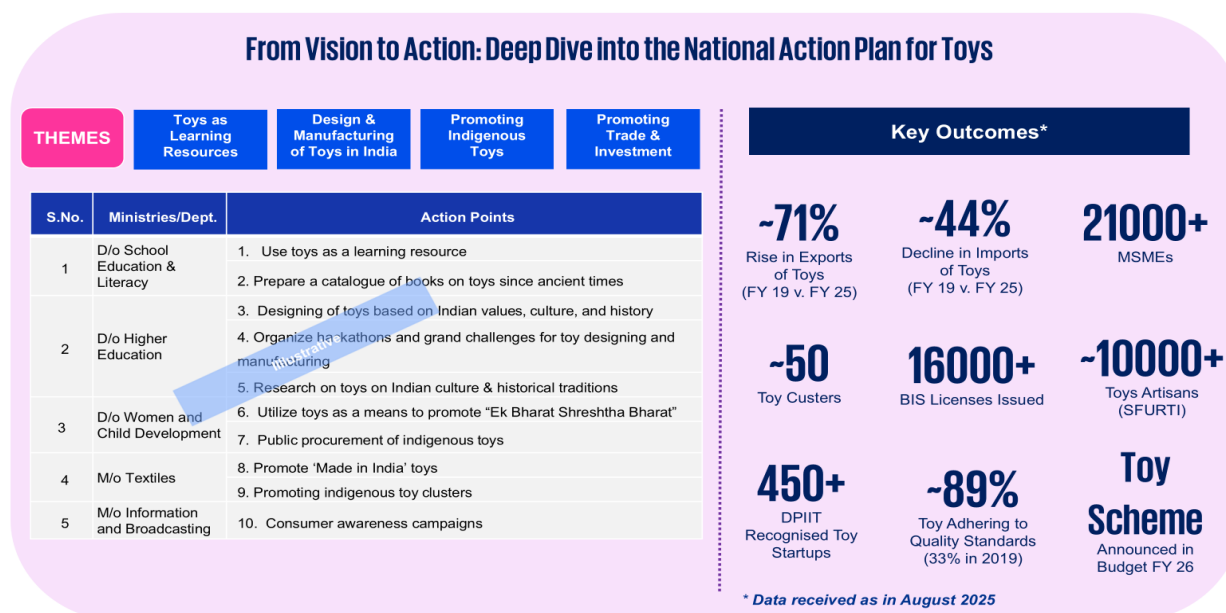

Figure 6: From Vision to Action: Deep Dive into the National Action Plan for Toys

• Ensure Adequate Skill Availability

A skilled workforce is fundamental for building a competitive and innovation-driven manufacturing economy. As product development across sectors becomes increasingly reliant on advanced machinery and automation, the need for technically trained and adaptable labor has grown significantly. The HS Codes Mapping Exercise shall help the redressal of skill development challenges in a focused manner by enabling comprehensive assessment of workforce needs tied to the value chain of each product.

This mapping allows Ministries/Departments to identify skill gaps at a granular level, facilitating targeted interventions that are region-specific, and industry aligned. It supports the development of a skilled workforce that meets actual industrial demand, thereby enhancing employment opportunities and strengthening the manufacturing sector. The exercise also fosters collaboration between Central and State institutions, ensuring that skilling efforts are inclusive and responsive to local needs.

The HS Code Mapping Exercise serves as a foundational input for facilitating identification of skill gaps, mapping essential and emerging skill requirements, and designing relevant skilling programs. Further, collaboration with industry may be undertaken to identify current on-ground requirements and industry-academia partnerships may also be fostered to co-design relevant skilling programs. In parallel, coordination with the Ministry of Skill Development & Entrepreneurship may support the inclusion of the identified skills and products into ongoing or upcoming national skilling programs. At the state level, the Government may onboard industries as collaborative partners for integrating them into local skilling efforts to ensure regional relevance and impact. This multi-stakeholder and demand-driven approach may

enhance employability, promote entrepreneurship, and ensure that skilling efforts remain responsive to evolving market needs.

Case Study: SAMARTH Scheme

➤ **Highlights**

The Ministry of Textiles made proactive efforts to strengthen the textile ecosystem by addressing sector-specific skill gaps through a targeted and collaborative approach. Recognizing the critical role of a trained workforce in enhancing productivity, product quality, and global competitiveness, the Ministry implemented a structured strategy focused on industry-aligned skilling through SAMARTH- Scheme for Capacity Building in Textile Sector. The Scheme aims to provide demand-driven and placement-oriented training in key sub-sectors including technical textiles, handlooms, handicrafts, silk, and jute. The Ministry adopted a decentralized and inclusive implementation model under the SAMARTH Scheme, engaging a wide network of Implementing Partners (IPs) including industry bodies, state governments, and sector-specific institutions. This collaborative framework ensured that training programs were tailored to regional strengths and market demands for enhancing employability opportunities across rural and urban areas.

Figure 7: Case Study of SAMARTH Scheme

➤ Strengthen Brand India

To strengthen the 'Made in India' brand globally, it is essential to ensure superior quality of domestically manufactured goods. The HS Codes Mapping Exercise facilitates the Ministries/Departments in identifying product categories that need quality enhancement. By focusing on quality in manufacturing, Indian products become safer, more reliable, and globally competitive, thereby, attracting investments, domestically and internationally, thereby, boosting exports. This section focuses on the elements which are vital for positioning India as a hub for world-class manufacturing, especially in terms of quality standards.

• Create Robust Quality Ecosystem

The HS Codes Mapping Exercise may be leveraged to assess the quality ecosystem of various products within their purview for identification of those requiring enhancement of quality compliance interventions to ensure consumer safety and product reliability. Based on these insights, the quality infrastructure may be strengthened through Quality Control Orders (QCOs) which are notified by the concerned Ministries/Departments for goods, articles, processes, systems, or services to mandate the compulsory use of the Standard Mark. For this purpose, the Bureau of Indian Standards (BIS) which serves as the National Standard Body of India is also consulted. The WTO framework recognizes under its Agreement on Technical Barriers to Trade (TBT) that countries may notify regulations for protection of national security, prevention of deceptive practices, protection of human health or safety, protection of plant/animal life or health, and protection of the environment.

Leveraging on QCOs shall help Ministries/Departments to elevate product quality and enhance value of 'Made in India' products. This exercise shall require proactive consultations and engagement with the industry members as well. By mandating compliance with Indian

Standards, QCOs shall ensure that product in the Indian market adhere the requisite quality standards, act as a transformative lever by encouraging producers to upgrade processes, adopt better technologies, and invest in quality infrastructure. The enforcement of QCOs thus plays a dual role, enhancing consumer trust and catalyzing industrial growth through improved quality compliance.

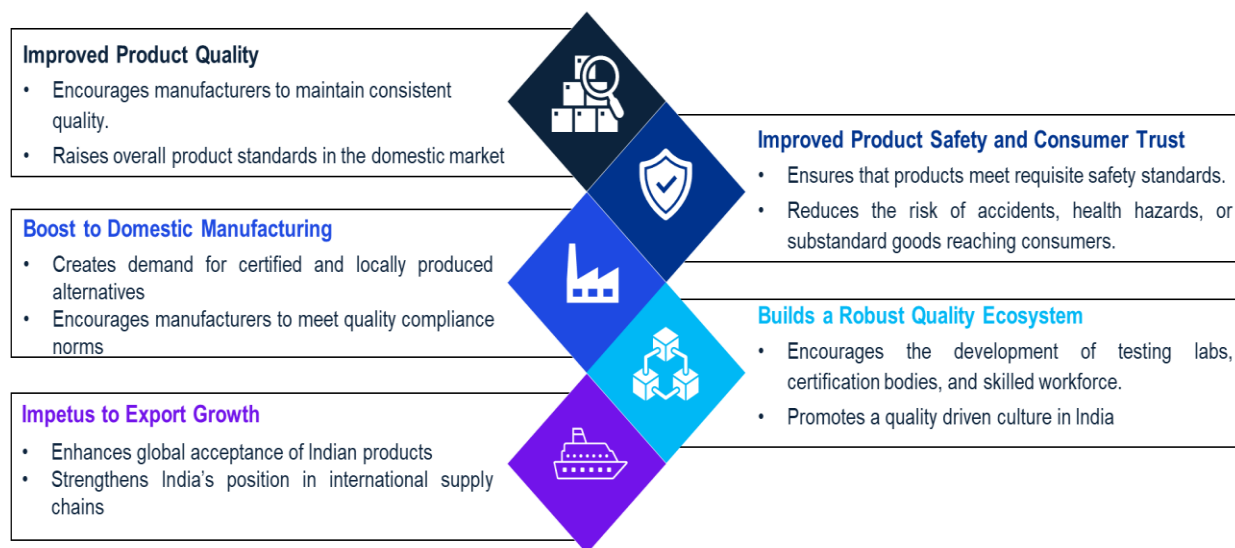

Figure 8: Key Benefits of Quality Control Orders

As part of this effort, DPIIT has issued 86 QCOs for 362 products under BIS Act, 1986/2016 (e.g. Cement, Pressure cooker, Pipes and Tubes, ACs, Refrigerators, Safety Glass etc.) and Indian Explosives Act, 1884 till August 2025. This expansive coverage reflects a strategic push toward embedding quality culture across industries. Building on this momentum, the implementation of QCOs for additional products may be considered to further reinforce consumer protection and elevate India's manufacturing standards. By driving compliance with Indian Standards, the initiative aims to elevate the overall standard of manufacturing and strengthen consumer confidence in domestically produced goods. The initiative on QCOs shall therefore, help develop world-class products of superior quality in India with 'Zero Effect, Zero Defect'.

Figure 9: Case Study of Toys (Quality Control) Order, 2020

➤ **Make for World**

For the strengthening of the global footprint of India, it is essential to develop a robust and balanced trade ecosystem that helps enhance export potential, reduce import dependency and secure the strategic interests of India in international markets. In this context, the HS Codes Mapping exercise plays a pivotal role by enabling a granular assessment of product-level trade dynamics across sectors by Ministries/Departments. This initiative shall facilitate identification of products where domestic capabilities need to be scaled up to meet global demand. This sub-section focuses on strengthening the global trade capabilities of India by enhancing sectoral competitiveness and supporting more effective Trade Agreement negotiations.

• **Develop Trade Prowess**

Enhancing the position of India in global trade scenario requires a dedicated approach that leverages on data and sectoral insights. The HS Codes Mapping exercise is instrumental in this endeavor as it shall help Ministries/Departments monitor trade flows, support the identification of sector-specific opportunities and allowing for more informed policy action. The trade capabilities of India may be pursued through 3 key facets of Import Monitoring, Import Substitution, and Export Promotion.

Figure 10: Facets of Development of Trade Prowess

Based on the HS Codes Mapping Exercise, Ministries/Departments may undertake import monitoring of products under their ambit to gain insights into trade patterns across parameters such as Country of Origin, quantity, value, and port of entry. This will enable early detection of supply chain vulnerabilities and overdependence on specific countries. Upon identification of critical import dependencies, efforts may be directed towards developing indigenous manufacturing capabilities to reduce reliance and strengthen domestic resilience. To support this, digital dashboards may be developed to enable real-time monitoring and data visualization. A well-designed Import Monitoring system may thus facilitate targeted policy interventions to safeguard national economic interests.

Import Substitution may be explored by identifying products where domestic capabilities need to be enhanced to reduce reliance on imports. Ministries/Departments may leverage on trade data to assess global demand, evaluate the current domestic production capacity, and identify gaps requiring to be filled through local manufacturing. Products with high import volumes and viable domestic production potential may be prioritized first for focused development of value chains. This approach shall enhance self-reliance, contribute to job creation, industrial growth and a more balanced trade ecosystem.

Export Promotion may be pursued by aligning domestic manufacturing with international demand. Export Diversification Products, where India currently lacks a strong presence but shows promise, may be explored to expand into new markets. These efforts shall help broaden the domestic export base, reduce concentration risks, and build long-term competitiveness. Sectoral strategies driven by data such as global import trends, RCA, and product complexity, shall help in export development.

- **Augment Effectiveness of Trade Agreement Negotiations**

In recent years, Trade Agreements (TAs) have emerged as key instruments for advancing economic cooperation and facilitating the movement of goods, services, and investments. Their evolution reflects the changing dynamics of global commerce, shifting geopolitical relationships, and the priorities of nations seeking to enhance competitiveness. India has signed several TAs aimed at expanding market access and deepening economic integration including the India-UK Free Trade Agreement (FTA), India-UAE Comprehensive Economic Partnership Agreement (CEPA), India-Australia Economic Cooperation and Trade Agreement (ECTA), among others. Such TAs offer several advantages which have been outlined below.

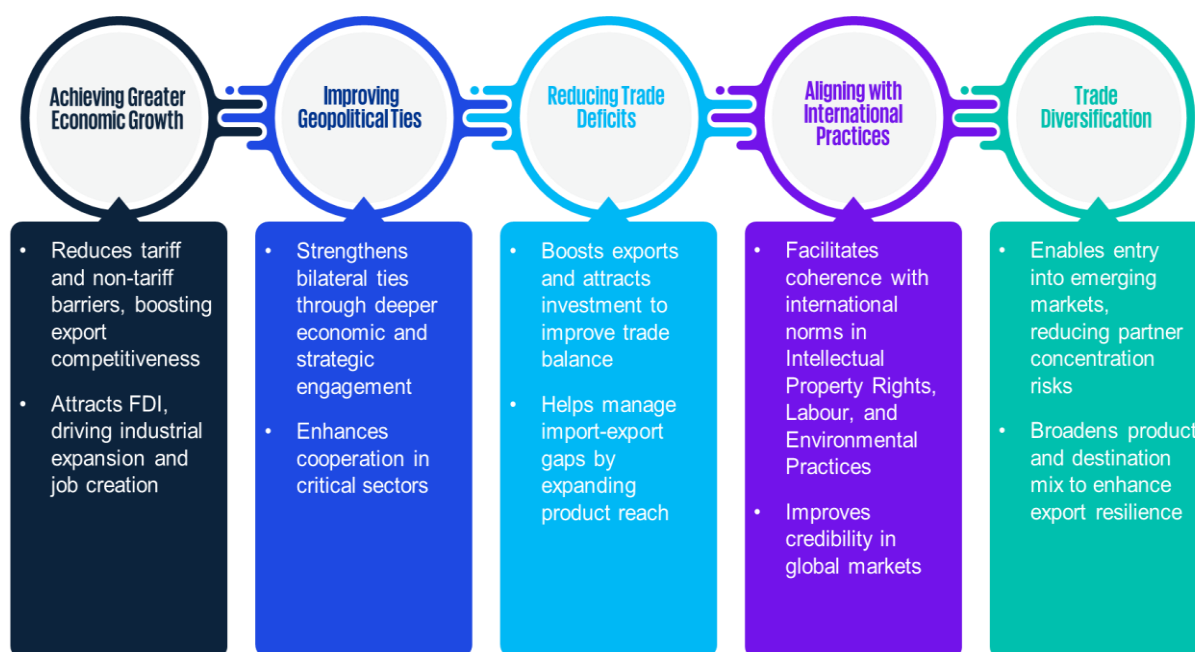

Figure 11: Advantages of Trade Agreements

To strengthen the effectiveness of TA negotiations, Ministries/Departments may utilize detailed product-level insights generated through the HS Codes Mapping Exercise. This data enables sector-specific analysis, allowing identification of products possessing strategic relevance, evaluating their export potential, and recommending appropriate tariff concessions and Rules of Origin (RoO) criteria. Their domain expertise ensures that inputs are targeted, evidence-based, and aligned with national priorities.

By examining product flows, Ministries/Departments can provide inputs for the development of Wishlist and Offer Lists, assess tariff and non-tariff barriers, and highlight sectors requiring focused attention. As international TAs increasingly cover broader areas such as digital ecosystems, sustainability, labor standards, and technical regulations, the involvement of a wider set of Ministries/Departments becomes essential. Their contributions shall help shape negotiating positions that are comprehensive, forward-looking, and consistent with the developmental objectives of India.

The proactive engagement of India with global partners has already delivered tangible outcomes by way of expanded market access, increased investment inflows, and deeper economic cooperation. To build on this momentum, Ministries/Departments may continue to provide product-specific inputs that are well-informed, balanced, and strategically sound. Evaluating key elements such as tariff structures, origin criteria, and regulatory standards ensures that negotiated outcomes are equitable, and supportive of domestic capabilities.

HS CODES ACCEPTED BY MINISTRIES/DEPARTMENTS

- 11,679 HS Codes have been successfully mapped and accepted by 31 Ministries/Departments
- The remaining 495 HS Codes, which have not been accepted by any Ministry/Department, have been grouped under a Residual List
- A summary table presenting the distribution of accepted HS Codes is provided below-

S. NO.	MINISTRY/DEPARTMENT	HS CODES (8-DIGIT LEVEL)
